

ABET Course Assessment Tool

Team sudo rm -rf, Team 5, and Team Final SegFault

Project Overview

Each term, students and faculty enter data for each course they are enrolled in/teach in the CSE department.

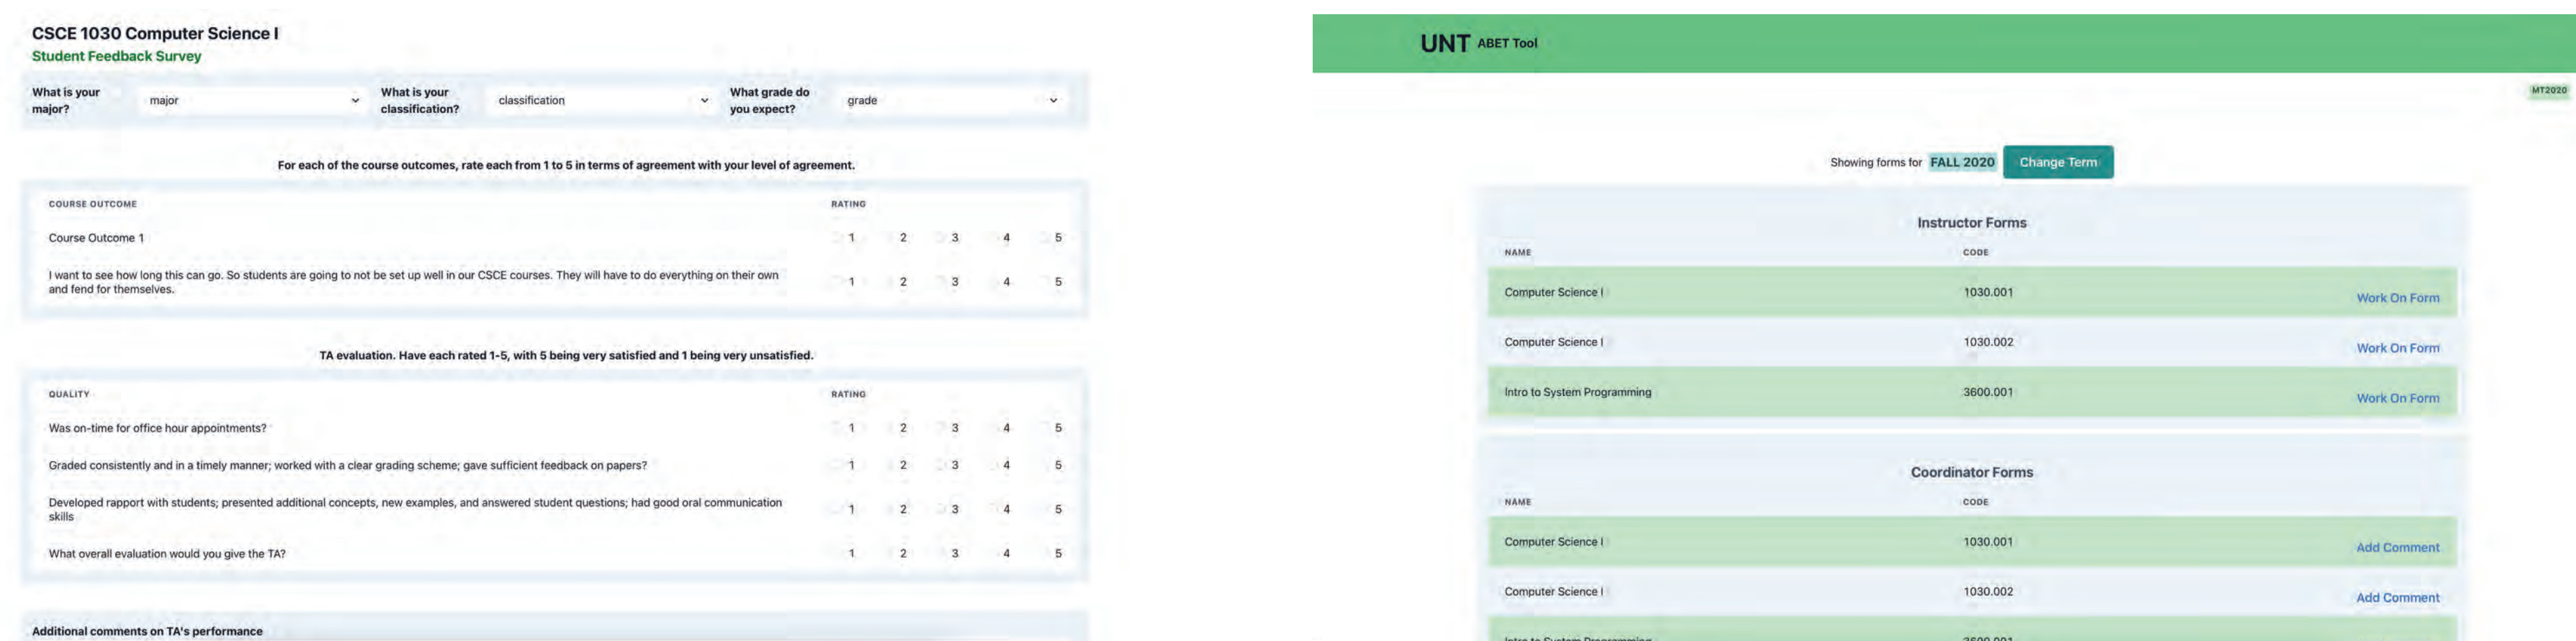

This data is used to assess the department courses for ABET accreditation. Near the end of the term, students are given a link where they assess their CSE courses based on pre-specified course outcomes.

After the course is completed, instructors have data (including attachments) that are provided.

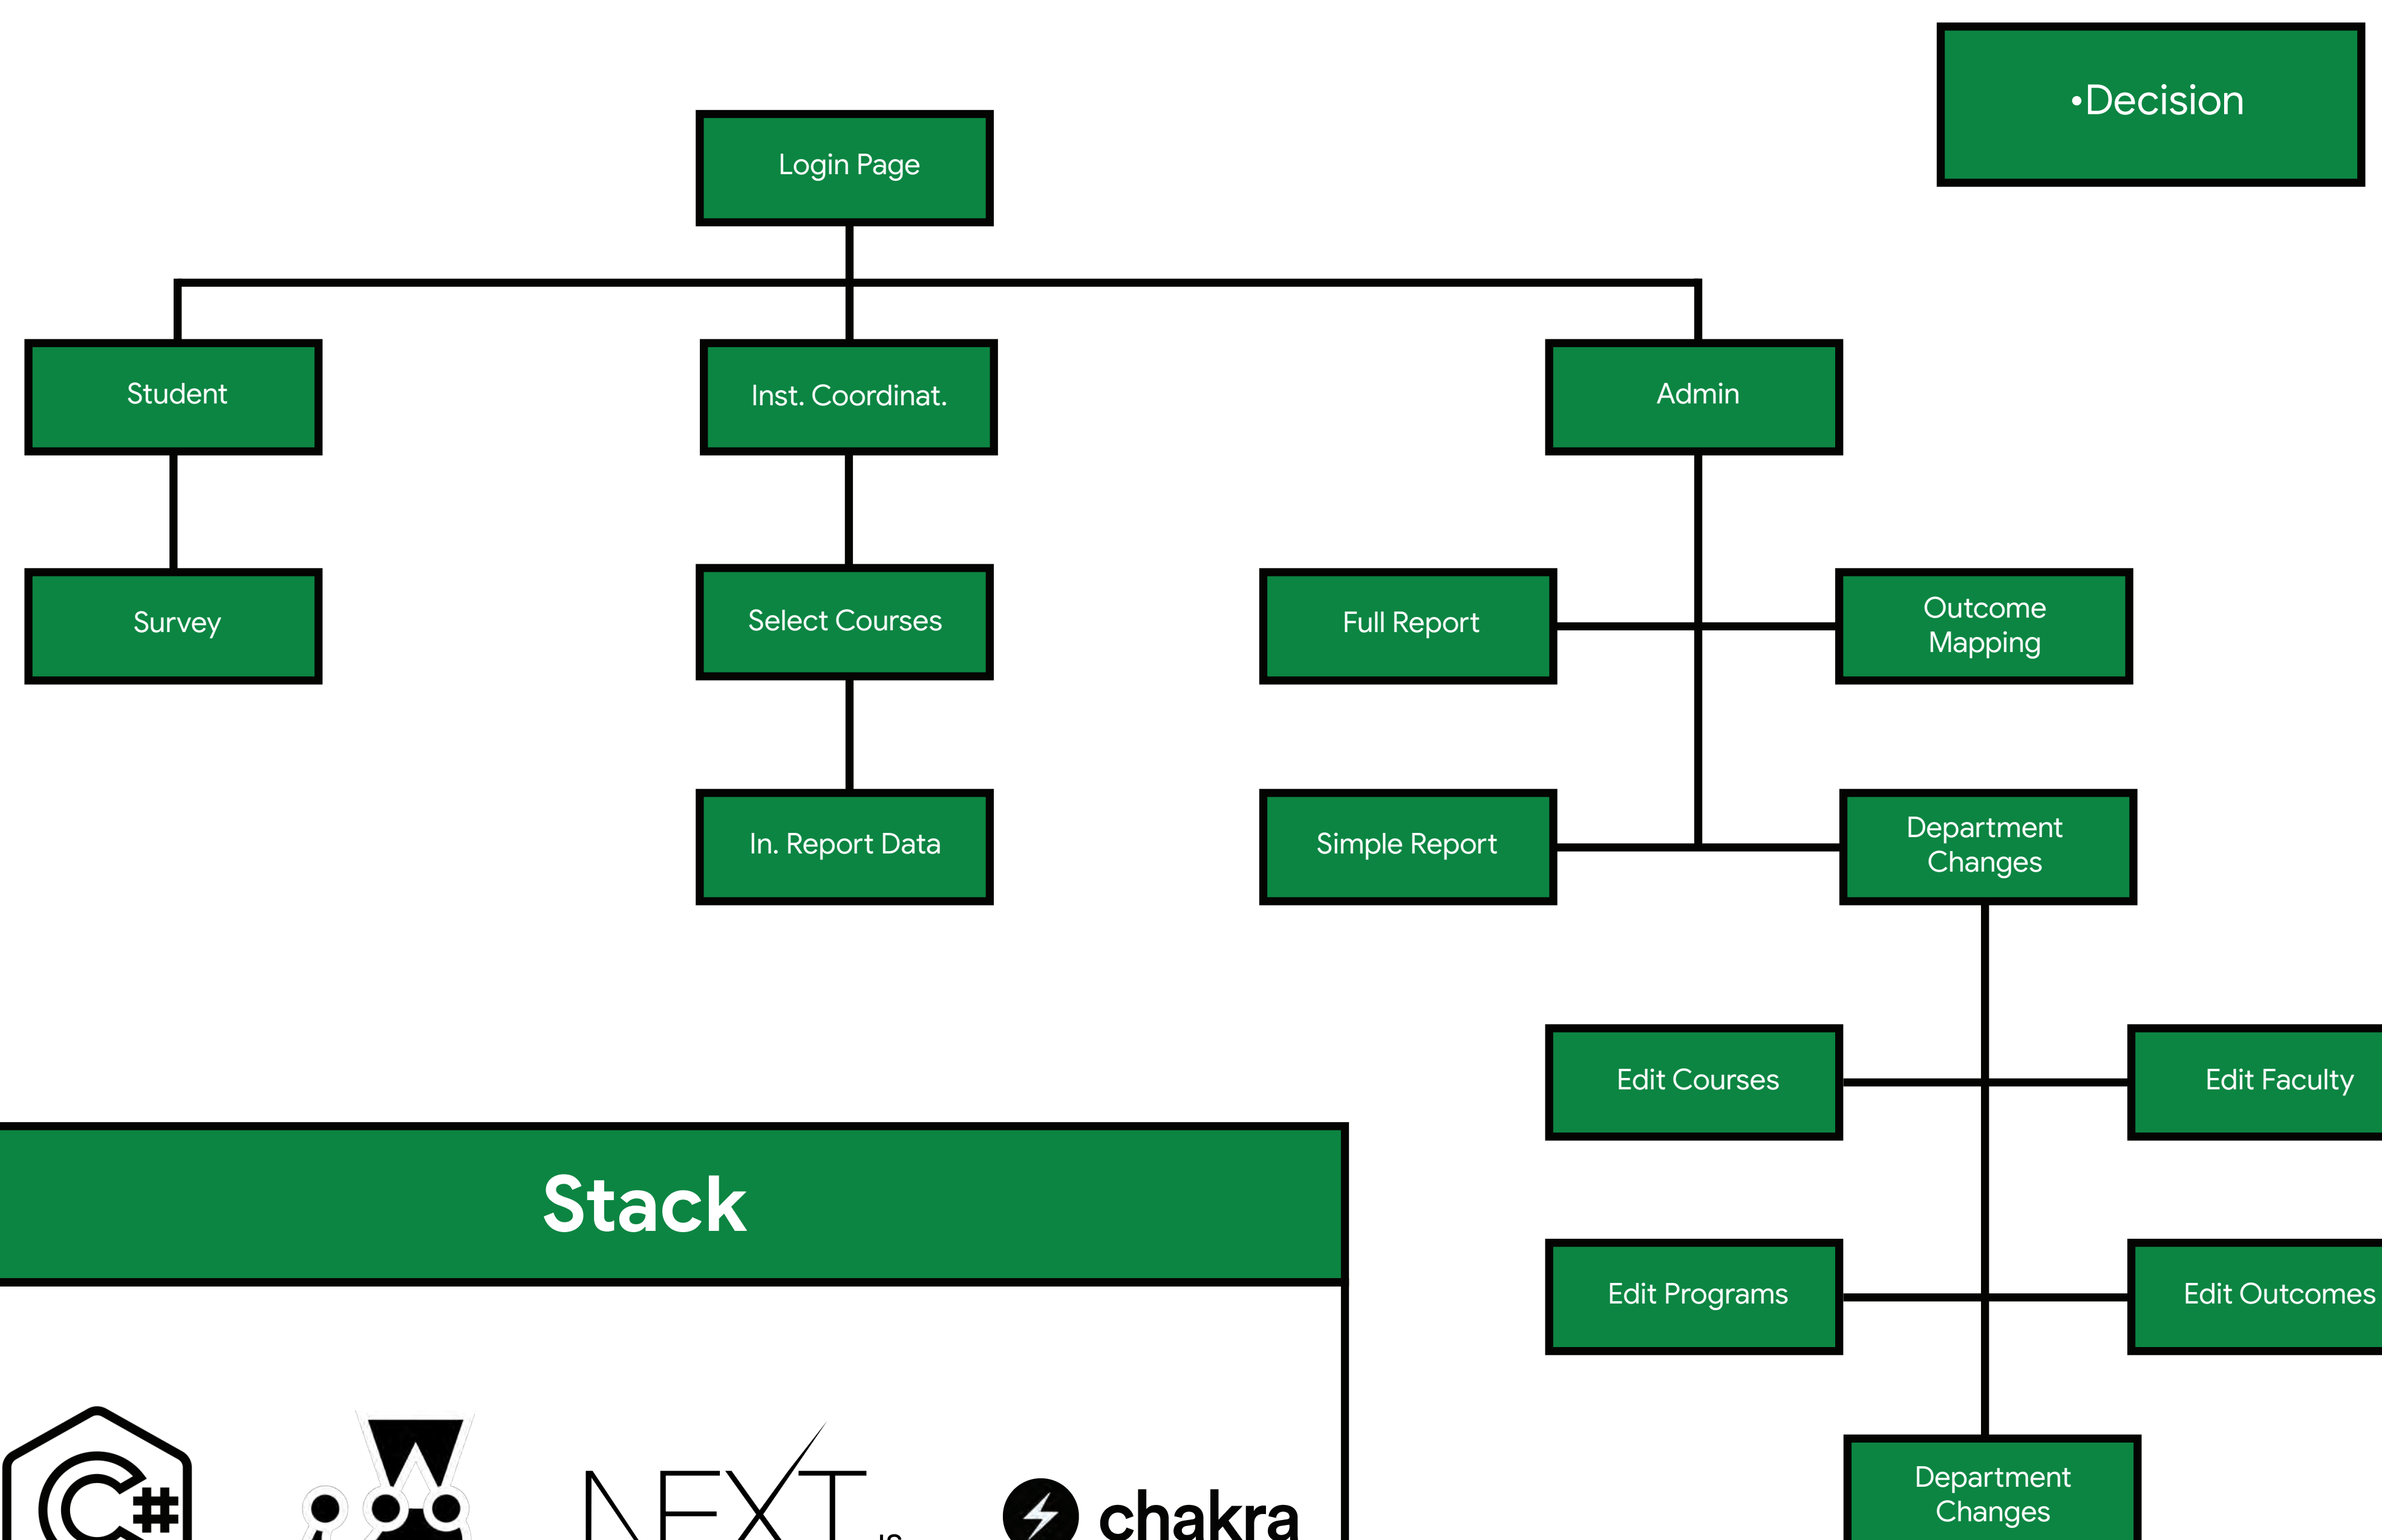

Features

- Course Survey Information
- Exit Survey Information
- Course Report Information
- Exit Survey Report
- Report Filtering
